

12. 个人中心页开发

纯静态页面，可参考代码。

```
<script setup>
  const logout = () => {
    uni.navigateTo({
      url: '../login/login'
    })
  }
</script>

<template>
  <view>
    <view class="p-3 flex align-center">
      <image src="/static/me.jpg" style="width: 120rpx;height: 120rpx;" class="rounded-circle shadow-lg mr-3">
      </image>
      <view class="flex-1 flex flex-column text-muted font">
        <view class="flex align-end">
          <text class="font-md text-dark mr-2">陶然然</text>
        </view>
        <text class="pr-2">软件工程师</text>
      </view>
    </view>
    <view class="bg-light" style="height: 20rpx;"></view>
    <view class="p-3">
      <progress class="mb-2" percent="80" active stroke-width="5" />
      <view class="flex align-center justify-between font">
        <text class="text-light-muted">总量: 100GB</text>
        <text class="text-warning">已用: 80GB</text>
      </view>
    </view>
    <view class="bg-light" style="height: 20rpx;"></view>
    <view class="flex justify-between p-3">
      <text class="text-muted font">设置</text>
      <image src="/static/arrow-right.png" mode="" style="width:40rpx;height: 40rpx;"></image>
    </view>
    <view
      class="bg-main text-white flex align-center justify-center font-md py-1 mx-2 rounded-circle"
      hover-class="bg-main-hover" @click="logout">
      退出登录
    </view>
  </view>
</template>
```
